Dear David,

Please consider this an affirmation of broadcast.

On 032673, at 0200-0330E, I was privileged to conduct a test of the transmission facilities of RI46K RNY, Kearney, Nebraska at the suggestion of my friends, Paul Hart of Fort Worth and Dave Fischer of Lincoln.

I was most pleased with the attention given this, and your response to the broadcast.

I offer to you my sincere thanks. In addition to your written response, I also received many phone calls during the course of the test. My thanks for those also!

At this time, I wish to make three apologies to you on these counts:

First of all, my reluctance to mention why, and for whom this broadcast was conducted. That having been my first time, I was a bit unsure of myself with respect to the FCC. Mr. Hart informs me that he had a bit of a chuckle at that.

Second, my use of this standardized system of information. Time, unfortunately, does not permit otherwise.

And third, the delay in this response. There were some major changes (for the better) at K RNY, and unfortunately this was cast aside.

page 2

I should mention, however, that if any interest is shown in conducting similar tests again, I have at my disposal the means, and would be happy to do so.

I would enjoy your correspondence particularly since I have moved to a new home and town. My new firm is evolved around engineering, and the installation of radio station audio equipment. (Please note new address and phone number, listed as Graephis Limited).

Again, my sincere thanks. If interested, let us hear from you.

Cordially,

A handwritten signature in cursive script that reads "Tom J. Russell". The signature is written in dark ink and is positioned above the typed name.
