Dear Mr. Thomas:

Thank you very much for your DX report on the morning of January 12th. Your copy is correct; we were running ID's about every three to five minutes so as it would be easier to copy it. I thank you for your efforts and the interest you have taken in this test. It is really amazing how far 500 and 1000 watts will go if there is no interference from other stations. We have had several reports from a number of southern states, however yours is the only one from Florida so far. Once report so far, has come in from Hawaii.

Enclosed is a copy of our coverage map and some other data that may be of interest to you. The other Spanish station was YVOD in San Cristobal, Venezuela if you are interested. The Cuban Station, I don't know the call letters.

Once again I certainly appreciate you staying up at such late hours to monitor us.

Sincerely,

RADIO STATION WJAG
