Hammonton, New Jersey

David F. Thomas
Proctorville, Ohio

Dear Sir:

I am very pleased to verify your reception of WNJH on 3/13/64 at 12:05 to 12:29 AM on our special test.

WNJH operates with 1000 watts power with a 250 watt standby. Our transmitter is located 1 mile south of downtown Hammonton and is remote controlled. Our program policy is "middle of the road" and the news service is "UPI". We operate daytime only.

Please excuse the long delay, as quite a few reports were received.

As you may know I am in the VRC and I would be pleased if you would write and tell me your past experiences with WUMS.

Thank you for reporting.

Sincerely,

David Aichelman
