DAVID F. THOMAS
Longwave Listening Post
Proctorville, Ohio

Dear Mr. Thomas;

This letter will confirm your reception of our station on 1340 KC on the morning of January 13th 1957.

Was very pleased to receive a report from your QTH as I think this is about the furtherest from which we have received a report. Unless Carey, Ohio is further.

In today's mail I also received a report from Elbert Tewell of Carey, Ohio, who is a member of the National Radio Club and reported reception of our station with fair to good results. He gave us a complete report of our transmissions with tone modulation and station identification every three minutes right down to the time of each identification.

Once again I would like to thank you for your report ~~was~~ which, despite the heavy QRM was no doubt our signal judging from your description.

If you would like to try again sometime under perhaps better conditions we conduct our regular frequency check every second Sunday of the month at the same time 3:15-3:30 AM. Hope to hear from you again,

I remain.....

Leroy L. Fuller Jr.
