

Dave:

Have to conclude test you heard  
was not WCSM. We ran very short bursts  
of tones, mostly music, morse code IDs +  
Voice IDs. Our pattern does not go south  
at all, so doubt we could have made it  
to FL. I was in Sarasota area last spring  
for  $1\frac{1}{2}$  months, so am a little familiar w/  
DX conditions down there, quite interesting.  
Thanks for trying for the test and writing, I'm  
a member of NRC. We were heard all the way to E. Coast. + NW to Minn. 73, Brad Lovett
