

Thank you for reporting the reception of WFAH-AM on  
2/17/57 between 1:15 and 6:00 PM.

We checked your report with our program log and found it to be substantially correct.

Our Transmitter is located on Route 173, 2 miles NW of town. We have a Collins 20 V 1 KW transmitter feeding a three tower array. Our major lobe faces SW since we must protect stations WKMJ, WERE and WNAE.

Thank you again for your report.

Yours truly,

D. A. Peterson, Mgr.
