Mr. David F. Thomas
Long Wave Listening Post
Radio WUMS
Proctorville, Ohio

Dear Mr. Thomas:

I was very pleased to receive your listening services on WMPO and was happy that our signal is so strong in Proctorville. However, in our first day of operation, August 28, our transmitter was not operating at full power, slightly under 1000 watts. We would appreciate it if you would run another test to determine if the WMPO transmitter, operated properly made any appreciable difference in signal quality.

We sincerely meant it when we invited you to visit. Please feel free to call anytime. Hope to see you soon.

Sincerely,

William C. Miller
