December 26, 1952.

Dear Mr. Thomas:

Glad to hear that we were heard that far south on December 21, 1952. There is no question about it being us that you heard. It isn't very ~~often~~ often that we get a report from that far away unless we have been testing in the wee small hours of the morning. Sorry that you didn't get an answer on your previous report but those do get lost once in a while.

Best of Wishes for the New Year

Burton L. Bowman
Chief Engineer
