David F. Thomas

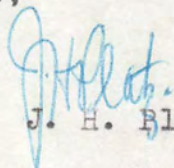

Proctorville, Ohio.

Thanks very much for reporting on your results receiving our special DX program January 12. Your identification of piano and organ selections were correct and I think you rate a verification. If you care to try again, we transmit for frequency measurement the third Monday of the month at 415AM PST but it will probably be too light there for you to get us.

Sorry to have been so slow in acknowledging. Shortly after the special program they put us on the shelf while the docs tried to make up their mind whether or not to put us on the shelf for a year or more of treatment. The decision was in our favor but we did lose a lot of valuable time and we're still making up - or trying to.

Thanks a lot for your report - and your patience.

Yours,

J. H. Blatz

Formerly Chief Engineer KIHR
