

10/14/54

Dear Dave,

We received your letter alright, and it was mighty nice to hear from you. We appreciate the fact that you wrote to us and commented on our signal.

In answer to some of your questions: yes, we get quite a few reports on distant reception. Our frequency checking service is located in Mount Vernon, Ohio (Woodward Measurement Laboratory). My folks pick us up approx. 130 miles from here. If there is any doubt in your mind concerning the station you were listening to - rest assured it was ours.

We use all Western Electric equipment, 12 KW XMTR, but we're only pushing 6.5 KW. ~~We~~ <sup>we</sup> use an Andrews sidemounted antenna with a gain of approx. 7 giving us around 40 KW ERP. Sometime you're in Pgh. drop out and see us - be glad to see you. Thanks again for writing.

Sincerely,  
Lindy Lindberg  
Eng. & Ann.
