(INCORPORATED)

WTEL BUILDING · 4310 · 14 N. BROAD ST.  
PHILADELPHIA 40, PENNSYLVANIA

March 24, 1960

Mr. David F. Thomas  
Longwave Listening Post  
Proctorville, Ohio

Dear Dave,

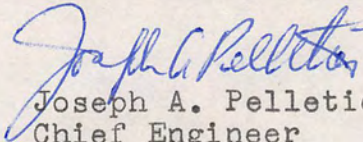

This will verify your reception of WTEL on March 22, 1960 at Proctorville, Ohio.

It was nice to hear from you again. (I have received reports from you at other stations. I wasn't at WTEL in 1932 when you last reported reception).

WTEL has been on the air since 1925 under several sets of call letters. First it was WFRE with 5 watts on 1210 ?? kc. Later it was on one or two other frequencies as WFKD with 50 and 100 watts of power. The present operation is 250 watts on 860 kilocycles.

Many thanks for your fine report and let us hear from you sometime in the future.

Yours very truly,

  
Joseph A. Pelletier  
Chief Engineer
