Dear Radio Friend.,

I want to thank you very much for your report about CKLD in the trip you made during you vacation time in Province of Quebec.

Our station is on the air every day from 7.00am to 12.00 pm with a power of 250 watts on the frequency of 1230kcs. We use one vertical antenna of 135 feet height on a mountain near the town of Thetford Mines. The elevation is 1248 feet from the sea level. All the equipment is RCA Victor.

Thank you again for your attention, and good luck.

Your Broadcast Engineer.,

Gaston Bilocq.,  
CKLD Thetford Mines.P.Q.
