

Radio Station

WFAK

149 WENTWORTH STREET

CHARLESTON, S. C.

Mr. David F. Thomas
Proctorville, Ohio

Dear Mr. Thomas:

The Station and I take pleasure in acknowledging your DX report. We are naturally very interested in the performance of our equipment and the information and reports received from fellows like you is a great help to us. Our Station is a kilowatt daytime station operating between sunrise and sunset. We are planning night time operation so this test we ran gives us some idea of what we might expect. Of course, with a signal like we were packing out Nov. 28th., we will probably be highly directional when we do get night time. We run a frequency check every fourth Friday of the month from 3:40 to 3:50 A.M. EST. in case you care to tune us in again. Possibably, another show for your club sometimes. Thanks again for the report.

Sincerely,
C. J. Modlin
