Dear David,

We deeply appreciate your report on the reception of our special test broadcast on the morning of January 30th. We have to date received approximately 25 reports from Club Members who joined us. Some of these reports came from as far away as Welland, Ontario; Weston and Hamilton, Ontario; St. Louis, Missouri; Tampa, Florida; and Lake City, Minnesota.

This will verify your report in all details. The accuracy of all the reports left no doubt that our test had a wide coverage.

We are grateful for the gallant band of dedicated DX'ers who add such a sparkle to the weary broadcasters life.

Thanks again---

Best of Luck

Harold C. Ward

Laurens, South Carolina 29360

P.S. Thanks for the report from Tampa. Yours was the only report we received from south of us. We run a middle-of-the-road format with emphasis on lush arrangements of the standards. At least if it doesn't go over as big as the rock-junk, we have the pleasure of listening ourselves. Thanks also for the info on the history of our call.
