WESTERN CANADA'S FARM STATION

Wheat Stalk Willie

January 28, 1954.

Mr. D.F. Thomas,
Protoiville, Ohio,
U.S.A.

Dear Sir:

It was a real pleasure to receive your report of our DX program of January 18, 1954. It is nice to know we are still getting out with this equipment.

This is the same equipment as used in 1934 although it has been boosted to 1000 watts, and a driver unit was added to in 1942 when the original went up in smoke one night.

The station went on the air in 1927 and I have a report from H.T. Tyndall Jr. 285 North Street, Burlington, Vermont who has a verie card dated March 1929, but in those days not many veries where sent so I imagine yours would be one of the first few sent from this station.

In those early years I was not with the station, nyself being a recent addition, but upon checking with the original engineer who is still associated with the station, your information I find is quite correct.

If your trip this year brings you in this area I would certainly be very happy to have you pay the station a visit, and we could ^{have} ~~have~~ talk, it should be interesting.

Yours truly,

H.F. McRae

H.F. McRae,
Chief Engineer.
