

Howdy fella: Thanks for your swell report of KAND  
on your reception of our signals during our FCC broadcast 10/13 1937 at  
2:40 C. S. T.

KAND is located at Corsicana, Texas, in the center of the famous Black Land Belt. County seat of Navarro County in the greatest Cotton producing section of the world. Here the first oil in Texas was discovered and we are still the center of the great East Texas oil fields.

KAND - uses a composite transmitter of 100 watts, utilizing all modern devises and circuit designs known to be good engineering practice. RCA speech equipment and turntables. A new type vertical antenna 179 feet high and radial ground system. Antenna is fed by concentric transmission line of high efficiency. KAND operates on a frequency of 1310 kilocycles.
