David F. Thomas
Post Office Box 11531
Tampa, Florida 33610

Dear Mr. Thomas,

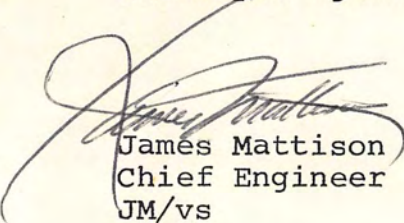

Thank you for the report of reception of KGBT.

KGBS became KGBT in the mid 50's in a complicated and involved transaction that involved the purchase (by us) of the then KSOX. This newly acquired property was on 1530 Khz with 50,000 watts as it is today. We then gave up 1240 Khz. In later years a 250 watt station was built in Raymondville, Texas and operates with the call letters KSOX on 1240 Khz (present and former owners not related).

It is interesting to note that we still maintain the original 250 watt transmitter as a stand by unit. In short KSOX became KGBT, and KGBT (formerly KGBS) became KSOX.

The call letters KGBS were sold by us to George B. Storer of Storer Broadcasting, and we took the call KGBT, the initials of the wife of our owner.

Thank you again for the report.

James Mattison
Chief Engineer
