Proctorville, Ohio

Dear Sir,

Thanks a lot for your nice letter and complete report on reception of this station on April 7th. According to our program log, reception as reported by you is correct.

KGVL is located about one mile north of Greenville. The station is complete in a Ranch Style, Air Conditioned building. All the equipment including the transmitter is composit. The only exceptions being the limiting amplifier, the frequency monitor and the modulation monitor. We have a vertical antenna 185 feet high.

If you are ever in this part of the "One Star State, we would be pleased to have you pay us a visit in person and let us show you around our station.

Very truly yours,

Stafford E. Davis
