

KPAB

LAREDO BROADCASTING COMPANY

HAMILTON HOTEL • LAREDO, TEXAS

November 9, 1944

David F. Thomas
Proctorville, Ohio

Dear Sir:

I thank you for the report on station KPAB, Laredo, Texas. This is the first report I have received from Ohio on my frequency checks. It was a lady announcer you heard, and the music was popular and modern dance music.

You will probably be interested in our equipment; It is Western Electric. The radiator is a verticle Blawnox 154 feet above ground level shunt fed. The ground system consists of 360 radials 150 feet long eight inches under ground surface. We are approximately 600 yards from the Rio Grande River. The conductivity of the soil is very poor, although we do have a very good ground wave in the local vicinity.

Yours truly,

Travis R. Chapman
