December 27th, 1938.

Mr. David F. Thomas,
Proctorville, Ohio, U. S. A.

Dear Sir:

Thank you for your report on reception of our frequency check program of December 12th, which checks with our log.

We are using Western Electric equipment throughout, transmitting on a day time power of 250 watts. Our radiator is a Blaw-Knox grounded vertical.

In addition to the FCC frequency check we transmit a commercial frequency check on the first Wednesday of each month from 1:30 to 2:00 AM CST.

We would be glad to consider you as one of our regular listeners on these programs, and would welcome further reports from time to time.

Incidentally, we are starting our Special DX Programs January 15th, and continuing through February 7th, from 2:00 to 3:00 AM.

We have a mighty fine assortment of souvenirs from Old Mexico, one for each individual making a complete report of reception during this period.

Very truly yours,

RADIO STATION KPAB

M. M. Valentine
General Manager.
