Dear Mr. Thomas,

Just arrived on shift and found your letter in my box. I have received many such letters from freinds all over the country but never one so interesting. Thanks a million for your interest. I immediately made a wild dash for the January program log to check your report which by the way was correct and also checked our operating constants which werex slightly under par giving us a power of only 420 Watts and our monitor was off the beam causing some distortion at this point so I was mildly speaking, amazed to hear from you. We get quite a few reports from KINY in Alaska that they here us after sign off up there as we are on till midnight. Our last day here in Everett will be June 15th. Try to pick up our sign off that night will you. I'll drop you a card when we open in Yakima.

Thanks again,

Jim Thain
