Procterville, Ohio

Dear Dixer :

WSHE is an independent station. Our equipment test turned out to be an success. Our signal was heard on both coasts with some interference on the west coast form a station in Japan. For part of the test their was an unmodulated carrier on some of the other listeners said. I believe it was WWJ in detroit Michigan. Also their was an Mexican station on during part of the test.

This is the conformation of your last letter and a VERIFICATION. I was sure glad to hear from you in Ohio. You see our station is directional, with a very ttight with most of our power beamed east.

Sincerly yours
George E. Schneider
