March 27, 1959

David F. Thomas
Proctorville, Ohio

Dear David:

Thanks for your comments concerning a recent scheduled dx program conducted by this station.

We have received several very nice cards and letters from the people who listened (?) in during this particular time. We have todate received only one report of reception from this program.

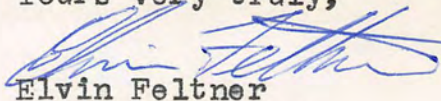

This was a very detailed report covering the first half-hour of the program and was received from a member of the National Radio Club near Toronto, Canada. I don't have his name at hand but the report was verified to the second.

We fed occasional tone and frequent identifications on the program so I'm afraid that we were not the station you heard.

From all reports received here in Welch the QRM was really tough March 9 and the all-niters crowded us out except for the Canadian report.

Thanks again, David, for writing us. I hope you will be able to log WOVE in the future.

Yours very truly,

Elvin Feltner
General Manager
