Marshfield, Ma

Phil,

After checking out our computer printout for 4/21, I find that your reception report is correct. We air the Unistar AM only format 24 hours a day with the exception of some local programming on Saturdays. WHYL AM operates a Harris SX-5A solid state 5kw transmitter on a 2 tower directional east-west (basically) pattern. We have been trying for over 2 years to acquire more nighttime power to serve the metro Harrisburg area, however, the FCC will not re-vamp the formula for power calculation. We are only 25 watts nighttime. Anyway, thanks for the accurate report, I'm enclosing one of our FM bumperstickers.

Yours,
