Dear Sir:

Thank you for your letter of November 15th regarding reception of our signal at Camp Pickett in Virginia.

CFOR operates on 1570 k.c., omni-directional day and night, using an R.C.A. 1000-watt transmitter and a 200-foot vertical radiator.

Orillia, Ontario, as you may know, is located some 80 miles north of Toronto, and we consider reception of our station at your Camp quite remarkable.

Thanks again for your interest!

Yours very truly,

(Miss) K.A. Leahey,
Secretary.
