Paul A. Thomas
Proctorville, Ohio

Dear Sir:

This is to verify your report of reception of our special program February 21, 1951. I appreciate your interest in the test.

WEOL operates with 1 KW power using four tower directional array using different pattern day and night. Our transmitter is an RCA BTA -1L. We have a four section RCA Pylon and number two tower fed by a RCA BTF-3B transmitter with 15 KW E.R.P.

Sincerely yours,

G. R. McCasland
