Proctorville, Ohio

Hi Paul:

Sorry to be so late in getting this verification off to you but I know you realize what a new station is going thru especially when the engineering personnel here was temporary. I came in about three weeks after the station went on the air with its regular programming and have been quite busy myself. We have installed a new transmitter since I have been here. Using all new gates equipment and like it fine. According to conversations with other personnel about the operation of the station during the period of equipment test I find that your readings were correct and thank you deeply for your interest and above all your patience in waiting for an answer to your report. I hope to hear from you in the future and assure you that any future reports will be handled immediately. Again thanks and the best of luck throughout this the new year of '52 and all the rest of the years to come.

Very truly yours,

C. A. Christensen
Chief Engineer.
