

THIS VERIFIES YOUR RECEPTION OF

WLAC

NASHVILLE, TENNESSEE
50,000 WATTS POWER - 1510 KILOCYCLES

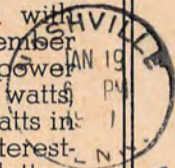

DATE OF RECEPTION Jan 14, 1950 TIME 3:30 am EST

COMMENTS _____

SIGNED J. D. Burns
Chief Engineer

W L A C

W L A C began operation with 1,000 watts power on November 24, 1926. Two years later power was stepped up to 5,000 watts, and increased to 50,000 watts in 1942. By far our most interesting file is one containing letters from DXers. Verification cards have been sent to listeners in England, New Zealand, Australia, Cuba, Panama, Newfoundland, Trinidad, Canada, Mexico and every state in the Union. This proves that our signal is being heard throughout more than half the globe. We are always glad to hear from new "fans", so tell your friends about us.

*Mr. Paul A. Thomas
Proctorville, Ohio*
